

MY JUPYTER NOTEBOOK ON IBM WATSON STUDIO

Onugha Silas

Data Scientist

I am interested in Data science because i would like to develop a model that can predict availability of crude oil in a particular area, this will help oil companies to minimize the waste of fund in drying a dry well.

The below should add 3 and 4 to give 7

In [1]: 3+4

Out[1]: 7

This is a blocked qoutes.

- This is a bullet point 1
- This is a bullet point 2

1. Numbering 1

2. Numbering 2
